THE SOCIAL DEMOCRATIC MARKET PLATFORM

Government provides the foundation. Citizens provide the ambition. Markets provide the growth.

The Social Democratic Market Platform rejects the false choice between centralized government control and unrestricted laissez-faire governance. It combines opportunity, growth, accountability, scientific progress, and fiscal responsibility into a practical governing framework.

Opportunity

Universal health insurance · Income security · Paid family leave · Universal preschool · Tuition-free public higher education · Housing affordability & homelessness

Growth

Competitive markets · Small business and entrepreneurship · Scientific research and innovation · Infrastructure modernization

Accountability

Anti-corruption reform · Campaign finance reform · Voting and civil rights · Officer accountability · Election security

OUR PRINCIPLES

✓ Opportunity should be universal.
✓ Markets should be competitive.
✓ Government should be accountable.
✓ Science should inform policy.
✓ Growth should be broadly shared.
✓ Public investment should be fiscally responsible.

Every program must have a named, single-use funding source and an independent cost estimate before it takes effect.

Build the foundation. Expand opportunity. Strengthen democracy. Invest in the future. Empower the people.
